

## **AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph beginning on page 3, line 20, with the following:

FIG. 7 shows a cross-sectional view of another embodiment of the medicament cartridge schematically shown in an injection device according to the present invention with the medicament cartridge having two chambers.

Please replace the paragraph beginning on page 6, line 4, with the following:

Figure 7 shows a cross-sectional view of another embodiment of medicament cartridge 212 used in a jet injector 213 according to the present invention. In general, most of the structure of medicament cartridge 212 is like or comparable to the structure of medicament cartridges 12, 112. Accordingly, the same reference numeral is used for like components. Medicament cartridge 212 comprises a tube 14 with a distal or first end 16 and a proximal or second end 18 wherein tube 14 defines a lumen 15 that has a cylindrical shape and a longitudinal axis. A portion of lumen 15 has an enlarged diameter which is designated as bypass 32.
